

Haneen Shawky

Cybersecurity & Penetration Testing Specialist

Your dedicated partner in protecting digital assets and building robust security.

Thinking Like an Attacker

“

I don't just test systems; I think like the attacker trying to break them. Every vulnerability I find is a door I close before the wrong hands can open it.

”

In a world of evolving threats, I combine technical skill with creative problem-solving to stay two steps ahead.

Security: The Power to Be Unstoppable

I believe security isn't just protection – it's the power to be unstoppable. Everyone wants to feel confident their personal data is out of reach from those who shouldn't have it – and that's exactly what I deliver.

My goal is to empower you with confidence in your digital resilience.

My Technical Arsenal

1

Languages

C++, Python, JavaScript, Dart

2

Security Tools

Nmap, Burp Suite, Metasploit, Hydra, Wireshark

3

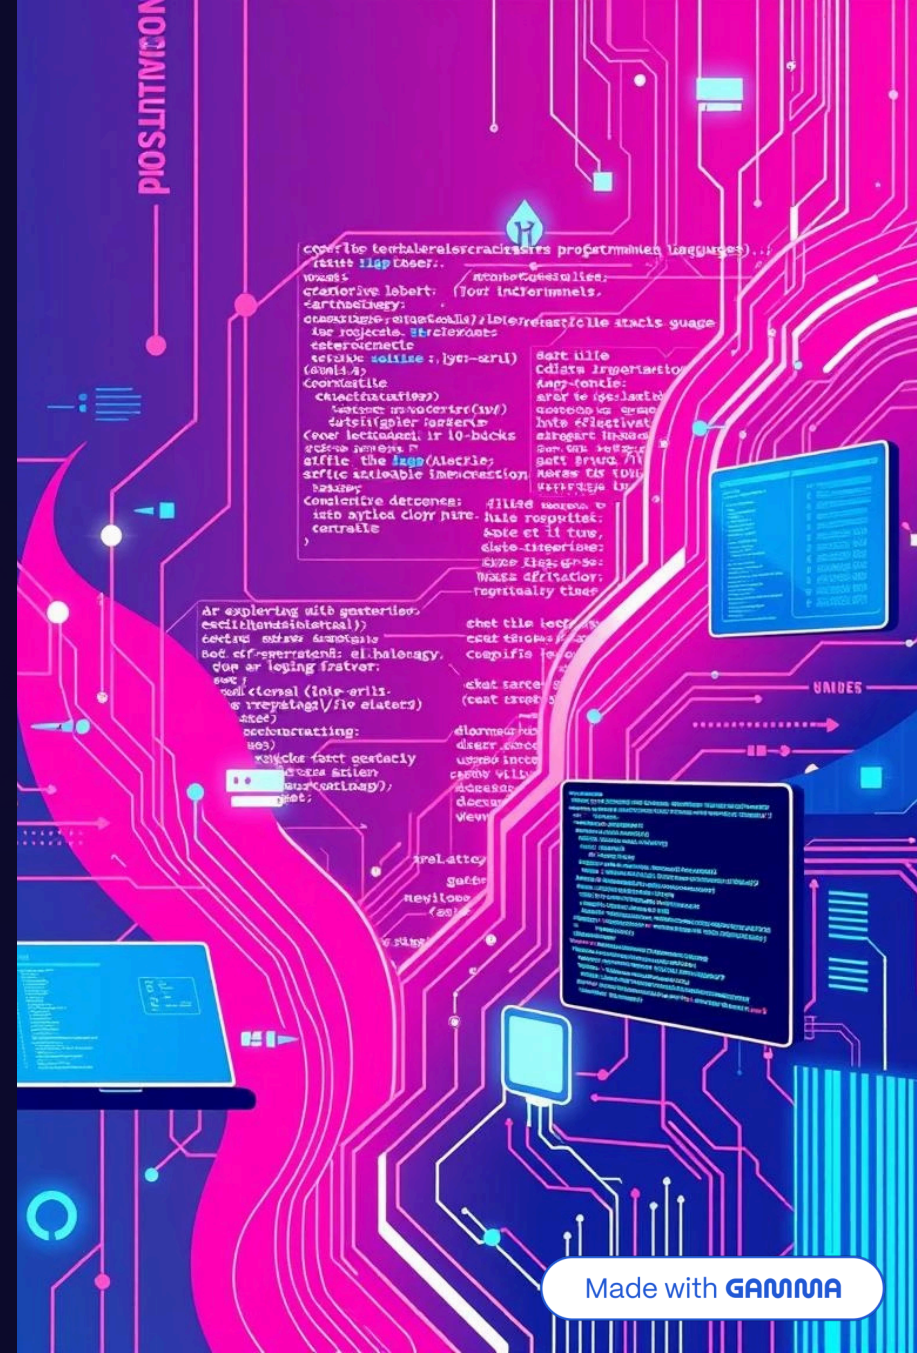

Frameworks

Flutter, REST APIs

4

Other Skills

Secure coding, Vulnerability assessment, API security

Why Partner with Me?

When you work with me, you're not just hiring a cybersecurity expert—you're gaining a dedicated partner in protecting your digital assets.

→ 24/7 Availability

Available within 24 hours for incidents, prompt responses to urgent matters.

→ Proactive Approach

Anticipating and preventing breaches before they happen.

→ Clear Communication

Translating complex concepts into understandable terms.

→ Continuous Learning

Staying ahead of emerging threats through ongoing education.

→ Customized Strategies

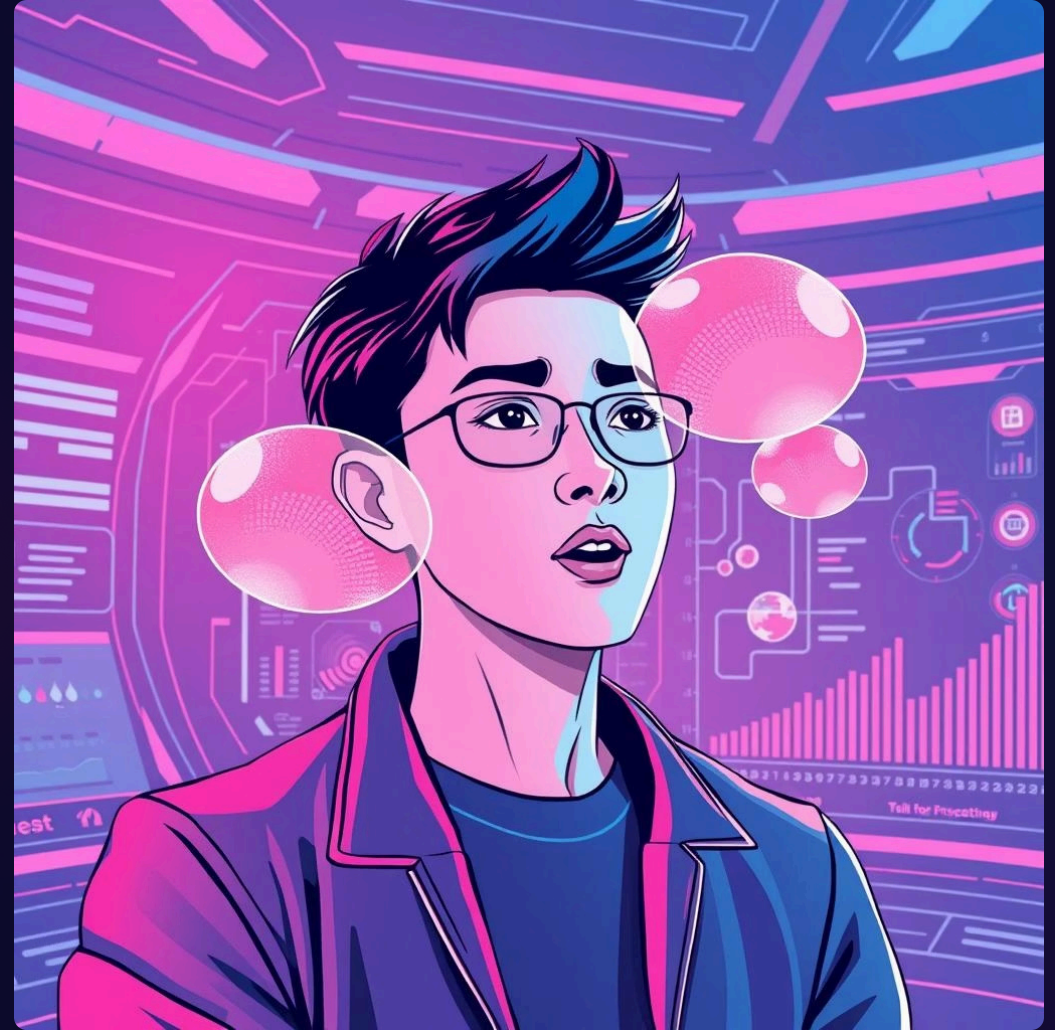

Tailored security solutions for your specific business needs.

Proactive & Transparent Security

Proactive Approach

I don't just fix problems—I anticipate them. My methodology focuses on preventing breaches before they happen, ensuring your defenses are always ahead of potential threats.

Clear Communication

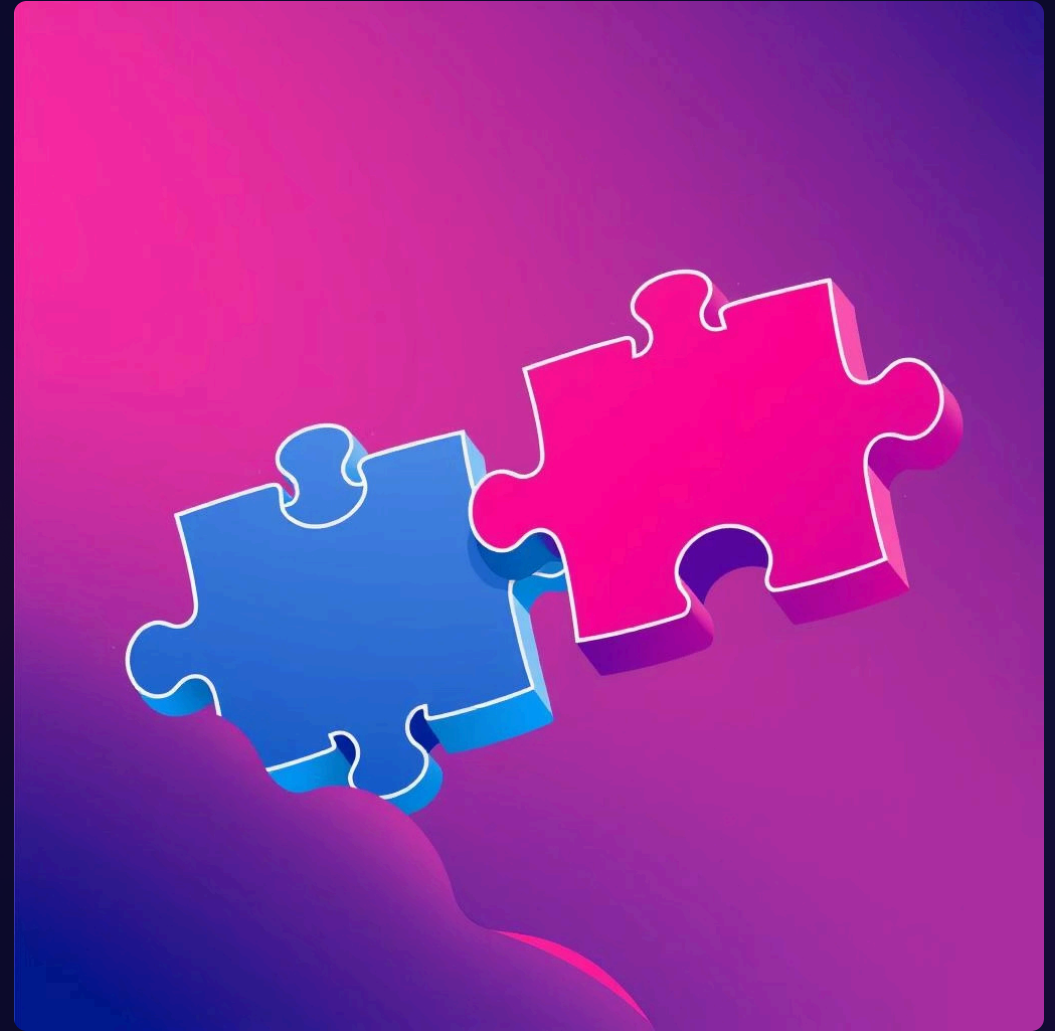

I translate complex security concepts into understandable terms, ensuring you are fully informed and empowered to make confident decisions about your digital security posture.

Evolving Expertise, Tailored Solutions

Continuous Learning

The cybersecurity landscape evolves rapidly. I stay ahead of emerging threats and vulnerabilities through ongoing education, training, and certifications, bringing you the latest expertise.

Customized Strategies

I develop tailored security solutions that align precisely with your specific business needs, industry regulations, and unique risk profile, ensuring optimal protection.

Key Projects: Secure Systems & Training

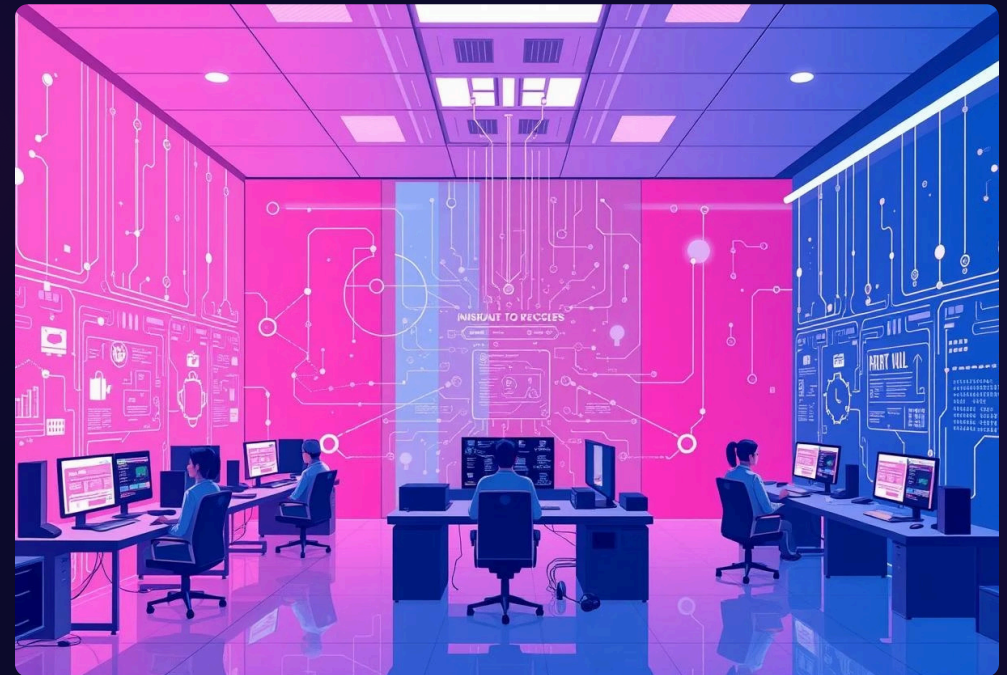

Multithreaded Smart Elevator Simulator (C++)

Designed and optimized a concurrent elevator control system with resource scheduling and race-condition prevention, demonstrating secure architecture in multithreaded environments.

Digital Egypt Pioneers Initiative Labs

Hands-on penetration testing training, including reconnaissance, exploitation, and vulnerability assessment, building practical skills in real-world scenarios.

Practical Applications: E-commerce & Mobile Security

Online Shopping Cart (C++)

Developed a functional e-commerce shopping cart system, thoroughly analyzed and tested for common vulnerabilities like SQL injection, ensuring robust security.

Quotes Mobile App (Flutter)

Built an interactive mobile application with robust XSS prevention and secure local storage handling, prioritizing user data integrity and privacy.

Secure your army with the unbeatable cyber soldier
